

Architecture

Keeping speed and security the focus of Compliant’s development, Microsoft’s *.NET* architecture was chosen as the underlying technology for Compliant. The application utilizes proven, industry leading solutions to bring its users a secure and scalable platform. The diagrams below outline the minimum, recommended and optimal configurations for deploying Compliant.

Required Software

- Microsoft Windows 2000 (MS Windows 2003 Recommended)
- Microsoft SQL Server 2000 with Service Pack 3 or higher.
- *.NET* Framework version 1.1.4322 or higher

Minimum Configuration – Single Server Environment

Recommended Configuration – Multiple Server Environment

Optimal Configuration – Enhanced Security & Distributed Environment
